PAYMENTS TO NOTARIES

You all know Notaries are part of Settlement charges and need to be shown on HUD section 1100, right? That's an audit exception that will pull your score down in the High Risk category.

In-house Notary Payment: Include PCT notaries in Settlement Closing Fees screen to include in Fee Ticket (income code 5669)

- Insert PCT Notary Name (i.e. Notary – Jane Doe and income code 5669)
- **Outside Notary Payment:** Put in Title Charges (B) Tab. This allows for a separate check payable to your notary. You won't need to modify your fee ticket and if you use your NAF so you won't need to audit your check! GFE Category > Roll up into 1101. (Put Seller Notary fees on a separate line.)

What is CRRAR & Why do you get errors?

Centralized Revue Reporting and Accounts Receivable –

an automated application that bridges our production system to our accounting system. Income dollars and income reporting categories, such as customer, liabilities, income codes for our different accounts are extracted to the company financial reports.

CRRAR Errors are caused by:

- 1) Wrong bill to information in "Bill To Customer screen". Must reference "CRRAR".
- 2) A different underwriter is selected on a TE transaction.
 - a) When we have a TE, our underwriter must be COM or ORT.
 - b) If you are set up to send a separate title check, EO must be used to generate that separate check.
 - c) If you keep all your fees your transaction is a TE and you must change :TC to :T.
- 1) Source of Business is not pulled from the NAF

Your income cannot be recognized until errors are corrected. Your trust accountant will let you know which error you have and how to correct it. As of today we've clarified these instructions in escrow terms (instead of accounting terms). Sharon Green is always available to assist! sgreen@pacificcoasttitle.com.
